PROJECTS

CollabSphere | *React, Node.js, Express, MongoDB, Socket.IO, Gemini AI*
Live | GitHub

- Built a real-time collaborative workspace application featuring multi-channel messaging and task management.
- Implemented bidirectional event handling without page reloads using Socket.IO for seamless communication.
- Integrated Google Gemini AI to provide an intelligent workspace assistant for quick problem-solving.

Product Browser API | *Node.js, Express, PostgreSQL*
Live | GitHub

- Developed highly scalable REST APIs optimized for efficient product browsing and dynamic category filtering.
- Implemented cursor-based pagination for faster data retrieval and a smooth user experience.
- Optimized database queries to efficiently handle and serve over 200,000+ database records.

EDUCATION

Master of Science (Physics) 2021 – 2023
Advanced Analytics & Problem Solving
Leveraged advanced studies in Physics to develop strong analytical, research, and complex problem-solving skills, which translate directly into backend logic and algorithmic thinking.

Bachelor of Science(Physics, Chemistry, Mathematics) 2018 – 2021

CERTIFICATION

Full Stack Web Development (MERN) | *Apna College* 2025 – 2026
Covered JavaScript, React.js, Node.js, Express.js, MongoDB, SQL, REST APIs and deployment.

REMOTE READINESS

- Built and deployed full-stack applications independently from scratch.
- Comfortable working with Git & GitHub version control in collaborative setups.
- Strong self-learning ability with experience integrating third-party APIs and AI tools.
- Highly capable of working independently and communicating effectively in remote environments.
